RESEARCH EXPERIENCE

Full-time Research Scientist, NLP Sep 2020-present

Abridge AI; Pittsburgh, Pennsylvania

Evaluated a deployed classifier across different populations to understand disparities in performance. Incorporated medical ontologies into information extraction techniques on doctor-patient conversations. Leading research reading group and knowledge dissemination to incorporate latest NLP research.

Research Intern Summer 2019

Google; San Francisco, California; Hosts: Praveen Paritosh, Jason Baldridge

Designed a scalable data scraping and annotation process to construct debates in the “wild” out of Reddit threads. Created a small dataset to validate the process and understand the nature of the data.

Deep Learning Research Intern Summer 2018

Salesforce Research; Palo Alto, California

Explored the discourse structure induced using different forms of attention, different objective functions, and adding a small amount of supervision.
